

## UPDATE

Vacancies and Appointments  
Number 353  
Monday 1 November 2010

### **Technician**

#### **Applied Entomology**

##### **Te Puke I Vacancy 3359**

Within our Applied Entomology group, this position provides technical support for research in sustainable pest management with a focus on kiwifruit crops. Working as part of a team, you'll be involved in a range of laboratory and field-based activities including management of insect cultures, measuring insect abundance, spray application, data entry and management, and the design and execution of experiments.

As a minimum, you will have a tertiary science qualification or equivalent experience in horticulture or agriculture together with sound laboratory skills. Knowledge of kiwifruit orchard production systems and insect sampling would be an advantage. A full New Zealand drivers licence will be essential.

For more information, registration details and to apply for this position please visit [www.careers.plantandfood.com](http://www.careers.plantandfood.com)
